Chapter 1: Introduction to the Manual

Using the caTissue User Manual

Introduction

Organization

Document Text Conventions

Chapter 2: What's New in caTissue Suite 1.0?

Getting Started

Viewing the Public Demo Site

Evaluating caTissue Suite Locally

Requesting a Demo

Chapter 3: Introduction to caTissue Suite

Overview of caTissue Suite Features at a High Level

User Roles

Basic Tissue Banking Workflow using caTissue Suite

caTissue Suite Data Objects and their Categorization

Chapter 4: Few First Steps ? System Administrator

Setting up caTissue Suite for Biospecimen Bank ? System Administrator Tasks

Creating an Institute, Department and Cancer Research Group

Provisioning Users

Creating Sites

Setting up Storage Containers

Creating a Storage Type

Creating a Storage Container

Specimen Array Type

Collection Protocols

Assigning Privileges

Distribution Protocols

Editing Administrative Objects

Creating New Dynamic Extensions Using the User Interface

Creating a Form

Containment

n Level Containment

Lookup Associations

Inheritance

Entering Data for Dynamic Extensions

Creating New Dynamic Extensions Using XMI Import

Importing Classes from XMI:

Exporting Forms to XMI

Steps to Generate caCore APIs for Dynamic Extensions

Known Issues in Dynamic Extensions

Chapter 5: Consent Tracking

Chapter 6: Handling Biospecimens ? Technicians and Supervisors

Registering Participants and Collecting Biospecimens

Collection Protocol (CP) Based View

Registering a Participant to a Collection Protocol

CP Based Data Entry (New Feature in Suite Release)

Specimen Operations

Aliquoting a Biospecimen

Creating Biospecimen Derivative

Adding Multiple Specimens

Adding a Biospecimen Event

Bulk Operations

Adding Specimen Array

Surgical Pathology Report (SPR)

Editing Biospecimen Objects

Chapter 7: Introduction to Clinical Annotations

Features of Clinical Annotations

Clinical Annotations Workflow

Assigning Annotations to a Collection Protocol

Entering Clinical Data and Pathological Data for Annotation

Querying on Annotations

Chapter 8: Ordering Biospecimens (New Feature in Suite Release)

Ordering Workflow

Ordering Specimen and Specimen Derivatives from Existing Specimen

Ordering Associated with Surgical Pathology Report (SPRs)

Ordering Biospecimen Arrays

Distribution of Ordered Items

Chapter 9: Search Data ? Simple Search and Advanced Query Wizard

Simple Search

Advanced Query Wizard

Add Limits

Advanced Options

Connecting the Limits

The Information Panel

Define Results View

Results View

Save Query

Canned Queries

Parameterized Queries

Accessing the Saved Queries

Appendix 1: Common Tasks ? Using the Biospecimen Tab

Deriving Plasma and Serum from Blood and Aliquoting

Deriving RNA and/or DNA from Tumor and Matched Non-malignant Tissue in Bulk

Appendix 2: Clinical Annotations

Data Entry for Clinical Information Annotation

Lab Annotation

Family History Annotation

Treatment Annotation

Rad RX Annotation

Chemo RX Annotation

Treatment Regimen

Environmental Exposure Health Annotation

Alcohol Health Annotation

Smoking Health Annotation

Health Examination Annotation

New Diagnosis Health Annotation

No Evident Disease Health Annotation

Recurrence Health Examination Annotation

Local Recurrence Health Examination Annotation

Distant Recurrence Health Examination Annotation

Pathology-Specimen Collection Group Clinical Annotation

Base Solid Tissue Pathology Annotation

Base Hematology Tissue Pathology Annotation
